Work Experience

Quality Distribution Inc. - Tampa, FL

Software Developer | February 2019 to Present

- Focused on the analysis, design, and development of new web applications to help make internal company processes more efficient
- Developed new ASP.NET Core MVC applications and REST APIs using C#, JavaScript, SQL, HTML, CSS, and Bootstrap
- Lead team in transition from .NET Framework to .NET Core with Continuous Integration through Jenkins and deployments utilizing Octopus Deploy

BST Global - Tampa, FL

Software Engineer | May 2018 to February 2019

- Wrote estimates, designed solutions, and developed new solutions specific to client needs
- Worked on small team to integrate a custom email templating solution throughout the company's primary enterprise software

PTS Solutions - Baton Rouge, LA

Senior Development Engineer | June 2015 - April 2018

- Started at PTS Solutions as an intern while I finished my senior year of college in May of 2015, and I worked my way up to Senior Development Engineer before I left in April of 2018
- Lead team and architecture of a small team for the Jail Management software rewrite utilizing WPF, C#, and SQL Server
- Played an integral part in rewriting the suite of applications that were used by law enforcement and emergency services
